Dear Ladies and Gentlemen,

If you are like me, you are being bombarded with phone calls, and mail ads touting whom you should support for very important offices. Most of these communiqués are trying to appeal to your emotions. Please, this time around, consider the platforms some of these would-be leaders spouse.

A number of good people running for national offices are members of our NAACP branch. As you know, the NAACP is a nonpartisan organization, and as such may not endorse any candidate on behalf of the NAACP. However, as individual American citizens, we may endorse and promote any candidate we desire.

What I am promoting are the ideas of using logic and reason as to who would be best in filling any of these important positions from the presidency on down.

I believe that the critical thinking process will allow us to use logic in making these critical decisions and determining who would be best in promoting the ordinary person's needs, such as reasonable salaries, affordable health care, keeping the social security program intact, and keeping cost of living increases for those on social security. We have a few good and honest folk running for office.

Please be very careful in vetting whom you vote for, regardless of political party.

President Purnell "Fred" Ross Jr.
Seacoast NAACP Branch # 2070
